

## **About Company:**

Established in 2018, SWA.TANTRAA provides comprehensive solutions for mental wellbeing. SWA.TANTRAA means self-help regarding wellbeing with the help of technological tools. It is beacon of light and trusted friend for those with mental Medical concerns. Mental Medical is just as important as one's physical Medical and yet, most of us are not mindful about the quality of our life. At SWA.TANTRAA we have experts with 25 years of experience in treating mental Medical and related issues with psycho-social modalities. Our expertise lies not only in treatment of mental illness, but also preventive and positive mental Medical.

We SWA.TANTRAA are offering Brain and Mind Franchisee Model at the Initial offered cost for our first 20 Franchisees across PAN India.

## **EMR:**

An Electronic Medical Record (EMR) is a digital version of a patient's paper chart. EMRs are real-time, patient-centred records that make information available instantly and securely to authorized users. While an EMR does contain the medical and treatment histories of patients, an EMR system is built to go beyond standard clinical data collected in a provider's office and can be inclusive of a broader view of a patient's care. EMRs are a vital part of Medical IT and can:

- Contain a patient's medical history, diagnoses, medications, treatment plans, immunization dates, allergies, radiology images, and laboratory and test results
- Allow access to evidence-based tools that providers can use to make decisions about a patient's care
- Automate and streamline provider workflow

One of the key features of an EMR is that Medical information can be created and managed by authorized providers in a digital format capable of being shared with other providers across more than one Medical care organization. EMRs are built to share information with other Medical care providers and organizations – such as laboratories, specialists, medical imaging facilities, pharmacies, emergency facilities, and school and workplace clinics – so they contain information from all clinicians involved in a patient's care.

## **Why we created EMR?**

With an experience of 20 years, we understand every in and out of the angles related to EMR. Whether it is patient's angle or doctor's angle, after trying and testing, upgrading and updating in multiple variations, we have specifically designed this EMR for Psychology.

## **Key Features:**

Automatic SMS Reminders to Patients  
Easy and Simple view of Patient's history  
Auto Translate RX  
Quick access to revenue and stock position  
50% time reduced to repeat prescription  
Easy recall of stored data for scientific paper presentation  
Sharing Records with patients

As we understand, many EMRs are the platform which is used universally depending upon profession to profession. But, this EMR is tailor-made and dedicated for Psychology.

## Screenshots of our EMR UI:

### 1. 2 level selection lists for clinical notes:

The screenshot shows the 'Examination' window with a 'Patient Progress' form. The form has two main sections for clinical notes, each with a 'Selected' column and a 'Description' column. The first section lists various medical conditions and symptoms, with 'Compliance' selected. The second section lists various medical conditions and symptoms, with 'Therapy missed' selected. The form also includes a 'Followup Notes' table and a 'Scale Report' section.

### 2. Basic assessments can be done by assistant without access to details of patients clinical notes.

The screenshot shows the 'EMR - [- Appointments -]' window with a 'Scale - Trial DRS' form. The form has a checklist of symptoms and a 'Fees Details' table. The checklist includes items like 'Check your Depression level', 'Check your Anxiety level', and 'Feeling nervous/ anxious/ on edge'. The 'Fees Details' table shows a list of fees with columns for 'P', 'F', 'S', and 'W'.

### **Why you should go for PsyHeal EMR?**

1. PsyHeal EMR is connected to UHID (Unique Medical Identification) as well as UIDAI (Aadhar).
2. We are not just on the cloud. We believe in securing your patient data and we want you to own the data. You can store your data on cloud as a backup but the local data will be stored on your server so that no one can access to it apart from you.
3. PsyHeal EMR comes up with the unique feature of SnoMed CT.
4. We have pre Recorded therapies for psychology patients
5. We have an online program which interferes through EMR so that you can give it to your patients for the betterment of their mental Medical.
6. We have one platform of PsyHeal which clearly says Psychological heal, designed and crafted for people who really need a psychological consultation and psychological evaluator right next to them in their phone.

### **Commercials:**

For Commercials, Kindly contact our Sales Team in the Contact Us Section.
